AMENDMENT

This is in response to the Office Action mailed from the United States Patent and Trademark Office on October 9, 2001 (Paper No. 12). A one month extension of time is respectfully requested and the appropriate fee is submitted concurrently herewith.

In the Specification

Please re-write the specification as shown below.

Please re-write the paragraph beginning on page 22, line 9, as follows:

Homologs and alleles of the RIP60 nucleic acids of the invention can be identified by conventional techniques. Thus, an aspect of the invention is those nucleic acid sequences which code for RIP60 polypeptides and which hybridize to a nucleic acid molecule consisting of the coding region of SEQ ID NO:1, SEQ ID NO:3, SEQ ID NO:5 or SEQ ID NO:50 under stringent conditions. The term "stringent conditions" as used herein refers to parameters with which the art is familiar. Nucleic acid hybridization parameters may be found in references which compile such methods, e.g. Molecular Cloning: A Laboratory Manual, J. Sambrook, et al., eds., Second Edition, Cold Spring Harbor Laboratory Press, Cold Spring Harbor, New York, 1989, or Current 586107.2
